

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY JULY 18, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was moderate in the West and light elsewhere. Nationally, 193 new fires were reported. Thirteen new large fires were reported, one each in the Rocky Mountain, Northwest and the Western Great Basin, two in the Southwest, three in the Southern California and five in the Northern Rockies Areas. Eight large fires were contained, two in the Southwest, and three each in the Northern Rockies and Northwest Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington and Wyoming.

SOUTHWEST AREA LARGE FIRES:

KINISHBA, Fort Apache Agency, Bureau of Indian Affairs. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is in ponderosa pine, woodlands and chaparral, two miles west of Whiteriver, AZ. Active fire behavior in the northwest portion of the fire was observed. Crews are constructing indirect containment lines and are conducting burn out operations. The communities of Cradlebrook, Over the Rainbow and Jurassic Park remain evacuated. The residences of Whiteriver will begin returning to that community today. Structure protection is in place for 150 threatened residences.

SPRUCE COMPLEX, Gila National Forest. A Type 2 Incident Management Team (Bateman) is assigned. This complex is composed of the Spruce, Silver, Nabours, and Parallel fires and is burning in brush, ponderosa pine and mixed conifer nine miles east of Glenwood, NM. Decreased fire behavior was observed on all fires within the complex.

MOLINA COMPLEX, Santa Fe National Forest. A Type 2 Incident Management Team (Philbin) has been ordered. This complex, comprised of the Capulin and Molina fires, is eight miles east of Cundiyo, NM. No new information was reported.

DRY LAKE COMPLEX, Gila National Forest. A Fire Use Management Team (Rath) is assigned; the Team is also managing the Turnbo fire. This lightning caused Wildland Fire Use complex, comprised of the Sycamore, Moonshine and Granny fires, is 27 miles northwest of Silver City, NM. The primary fuels involved in these fires are pinyon pine, juniper, ponderosa pine and grass. The complex is being managed to accomplish multiple resource objectives. Fire activity decreased due to increased relative humidity.

STEEPLE, Apache-Sitgreaves National Forest. This fire is in mixed conifer with heavy dead and down fuel, five miles east of Hannagan Meadow, AZ. Creeping fire behavior with short uphill runs, and little growth was observed. Personnel are burning out along Highway 191. Structure protection is in place for 13 threatened structures.

LARGO, Apache-Sitgreaves National Forest. This fire is in ponderosa pine, pinyon pine, juniper and grass, 15 miles south of Alpine, AZ. Active fire behavior with short uphill runs, torching, and short range spotting was observed. Crews made good progress constructing containment lines. Structure protection is in place for 31 threatened structures.

TURNBO, Gila National Forest. A Fire Use Management Team (Rath) is assigned. This fire is in mixed conifer with heavy concentrations of dead and down fuel, 37 miles northwest of Silver City, NM; and is being managed with a confinement suppression strategy. The fire decreased in intensity due to higher relative humidity.

MAPLE, Apache-Sitgreaves National Forest. This fire is in grass, brush and ponderosa pine, 25 miles northeast of Clifton, AZ. The fire is being managed with a confine/contain strategy. No new information was reported.

DIVIDE, Gila National Forest. This fire is seven miles southeast of Aragon, NM. Moderate fire behavior was observed in grass, ponderosa pine and mixed conifers. Crews are conducting burn out operations and holding containment lines.

GRANITE, Gila National Forest. This fire is 13 miles northwest of Hillsboro, NM. Recent precipitation resulted in minimal fire behavior. Personnel are preparing existing trails for containment lines.

LUERA, Socorro District, New Mexico - State Forestry. This fire is in pinyon pine, ponderosa pine, juniper and Douglas fir, 20 miles south of Datil, NM. No significant change occurred.

SKELETON, Arizona State. This fire is in desert shrub, brush and open grassland, 15 miles east to northeast of Douglas, AZ. Minimal fire behavior was observed due to rain received over the area. The fire is being monitored by aerial reconnaissance.

POPCORN, San Carlos Agency, Bureau of Indian Affairs. This fire is in pinyon pine, juniper, and brush, 35 miles northeast of Globe, AZ. No new information was reported.

LIGHTNING, Colorado River Agency, Bureau of Indian Affairs. This fire is in salt cedar, arrowweed and mesquite, 11 miles southwest of Laughlin, AZ. Crews are mopping up and monitoring.

EASTERN GREAT BASIN AREA LARGE FIRES:

EAST TABLE, Bridger-Teton National Forest. A Type 2 Incident Management Team (Broyles) is assigned. This fire is ten miles east of Alpine, WY. Favorable winds minimized fire growth and behavior in grass and heavy timber. Crews are improving and constructing containment lines.

TOBIAS, Salmon-Challis National Forest. A Type 2 Incident Management Team (Van Bruggen) is assigned. This fire is in grass, sage and mixed conifer with dead and down fuel, 18 miles north to northwest of Leadore, ID. A decrease in fire behavior was observed due to favorable weather. Crews are constructing fireline. Structure protection is in place for two residences that are threatened.

BLACKWALL, Salmon-Challis National Forest. A Type 2 Incident Management Team (Kechter) is assigned. This fire is in mixed conifer with heavy ground fuel, 32 miles north of Salmon, ID. Active fire behavior driven by strong winds produced spotting and short crown fire runs. Crews are improving and constructing fireline.

BULLDOG, Richfield Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Brunner) is assigned. This fire is in oak, mountain mahogany, juniper and pinyon pine, 17 miles north of Ticaboo, UT. Moderate fire behavior with isolated torching and small runs was observed. Crews are improving containment lines and conducting burn out operations. One commercial property and several out buildings are threatened; structure protection is in place. Reduction in acreage is due to more accurate mapping.

FARMINGTON, Wasatch-Cache National Forest. This fire is one-half mile east of Farmington, UT. Creeping and individual tree torching within the interior was observed in oak brush, cheat grass, spruce and fir. Crews are mopping up and improving fireline.

ROCKY MOUNTAIN AREA LARGE FIRES:

GRAMM, Medicine Bow National Forest. A Type 2 Incident Management Team (Mullenix) is assigned. This fire is 30 miles southwest of Laramie, WY. Active ground fire with short runs of crowning, torching and spotting were observed in ponderosa pine. Crews and dozers are constructing containment lines and are conducting burn out operations. Structure protection is in place for 241 threatened structures.

BALCONY HOUSE COMPLEX, Mesa Verde National Park. A Type 2 Incident Management Team (Sczapanik) is assigned. This fire is in pinyon pine and juniper fuels. Extreme fire behavior was observed. Suppression will begin on the Mocassin fire, the White fire will be monitored, and crews will continue mop up on the Balcony and Park fires.

DEEP LAKE, Shoshone National Forest. This fire is 30 miles northwest of Cody, WY. Active fire behavior with torching and spotting was observed. Personnel are constructing containment lines and burning out.

CARR, Garfield County, CO. A Type 2 Incident Management Team (Blume) is assigned; the Team is also managing the Brush Mountain fire. This fire is in pinyon pine, juniper and sagebrush, 13 miles northwest of DeBeque, CO. Creeping fire behavior with isolated torching was observed. Crews are constructing containment lines and mopping up. Structure protection is in place for six residences.

BRUSH MOUNTAIN, Garfield County, CO. A Type 2 Incident Management Team (Blume) is assigned. This fire is 30 miles north of Grand Junction, CO. Creeping fire behavior was observed with short runs and isolated torching in spruce, fir, pinyon pine, juniper, brush and grass. Crews are reinforcing fireline and mopping up.

BEAR CREEK, San Juan National Forest. A Fire Use Management Team (Clark) is assigned. This Wildland Fire Use fire is in spruce and fir, five miles northeast of Vallecito, CO. The fire is being managed for resource benefit. Slow burning through dead and down fuels and occasional torching was observed. Crews are holding fireline and mopping up on the south flank.

DOUGLAS, Crook County. This fire is in grass, sagebrush and juniper, 13 miles north by northeast of Four Corners, WY. Active fire behavior with crowning, torching and short range spotting was observed. Engine crews are holding and constructing containment lines. Structure protection is in place for the 46 structures that are threatened.

OTTER, Johnson County. This fire is burning in spruce, sage and slash, 20 miles northwest of Kaycee, WY. Moderate fire behavior was observed, with creeping, smoldering and some torching and spotting. Personnel continue to mop up.

NORTHWEST AREA LARGE FIRES:

CLARK, Willamette National Forest. A Unified Command has been established between a Type 2 Incident Management Team (Gardner) and An Oregon Department of Forestry Incident Management Team (Labhart). This fire is in understory and timber with dead and down fuels, ten miles northeast of Lowell, OR. Active fire behavior with running, torching and spotting to the north northeast was observed. Crews continue to protect private property and campgrounds in the Fall Creek corridor and improve contingency lines on the north, northwest and east flanks.

FAWN PEAK COMPLEX, Okanogan-Wenatchee National Forest. A Type 1 Incident Management Team (Lohrey) is assigned. This complex is comprised of the Fawn Peak, Sweetgrass and Farewell fires; the Fawn Peak and Sweetgrass fires have been controlled. The Farewell fire is in sub-alpine fir with heavy dead and down timber, 13 miles northwest of Winthrop, WA. Fire activity decreased today in the area of the Pasayten Wilderness Area boundary, but made substantial runs to the north in the area of Andrews and Little Andrews drainages.

NORTHERN ROCKIES AREA LARGE FIRES:

BIG COULEE, Miles City Field Office, Bureau of Land Management. This fire is in grass, ponderosa pine and juniper, 30 miles northwest of Jordan, MT. Extreme fire behavior with torching, crowning, and spotting one-half mile ahead of the front was observed. Structure protection is in place for eight threatened structures.

AMETHYST, Yellowstone National Park. This fire is in old growth timber, litter and understory, 25 miles southeast of Mammoth Hot Springs, WY. Intense burning with significant torching and spotting was observed. Crews are constructing fireline and containing spot fires.

MICKEY BUTTE, Charles M. Russell National Wildlife Refuge. This fire is in timber, 50 miles south of Malta, MT. Crown fire runs in timber were sustained for over one mile were observed.

ASH DRAW, Miles City Field Office, Bureau of Land Management. This fire is in grass and timber, 85 miles southeast of Mile City, MT. Creeping fire behavior was observed. Crews are completing fireline and mopping up.

REED, Lewistown Field Office, Bureau of Land Management. This fire is in timber 50 miles northeast of Lewiston, MT. Active fire behavior with running and torching was observed. Personnel are holding containment lines on the north flank.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

COYOTE, Monte Vista Unit, California Department of Forestry and Fire Protection. This fire is in chaparral, four miles east of Julian, CA. Extreme fire behavior due to terrain was observed. Structure protection is in place for 100 residences

O'BYRNES, Tuolumne-Calaveras Unit, California Department of Forestry and Fire Protection. This fire is in grass and brush, ten mile northwest of Jamestown, CA. No further information was received.

LIGHTNING, San Bernardino County FD. This fire is in brush and trees in a river bottom area, 10 miles north of Needles, CA. Erratic fire behavior due to a thunderstorm in the area was observed. Crews are constructing containment lines.

EUCALYPTUS, San Benito-Monterey Unit, California Department of Forestry and Fire Protection. This fire is in heavy brush and oak woodland, five miles east by northeast of Del Rey Oaks, CA. Extreme rates of spread due to high winds were observed. Crews are holding existing containment lines and conducting burnout operations.

OUTLOOK:

Weather Discussion: High pressure will be centered over western Colorado today, with moisture wrapping around the edge of the high throughout the west. The remnants of Claudette will rotate around the high as well, entering southern California during the early morning hours. Moisture and instability will increase today into northern California and across the central Great Basin, leading to isolated dry lightning strikes. Scattered wet and dry thunderstorms will continue over western parts of the Southwest and across the Rocky Mountain Area today.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
EASTERN GREAT BASIN AREA Partly cloudy with a slight chance of mountain thunderstorms, wet and dry.	Idaho, Bridger-Teton 70 to 94 mountains, 81 to 103 valleys. Utah and Arizona Strip 82 to 98 higher elevations, 90 to 104 valleys.	Idaho, Bridger-Teton 20 to 40% mountains, 9 to 20% valleys. Utah, Arizona Strip 15 to 23% mountains, 9 to 14% valleys.	Light and variable region wide, except gusts up to 35 mph in the vicinity of thunderstorms.
SOUTHERN CALIFORNIA AREA Mostly cloudy over southern California with scattered showers and a chance of thunderstorms. Partly cloudy over the Sierra eastward with a slight chance of thundershowers. Elsewhere, partly cloudy.	70 to 85 coastal areas. 80 to 95 mountains. 85 to 100 valleys. 100 to 108 upper desert. 105 to 115 low desert.	10 to 20% deserts. 15 to 30% mountains. 20 to 35% valleys.	Southeast to southwest 5 to 15 mph.

WESTERN GREAT BASIN AREA Mostly sunny skies in the morning with afternoon cloudiness and a good chance of afternoon thunderstorms, dry in the north and wet in the south.	Upper 80s to near 100 valleys, 80 to 90 mountains, with a maximum of 105 in the southern deserts.	8-20% at lower elevations, 12 to 25% in upper elevations and 25 to 5% in the Sierras.	Generally upslope/up canyon in the afternoon at 8 to 15 mph, with areas of 10 to 20 mph.
---	---	---	--

http://www.nifc.gov/sixminutes/dsp_sixminutes.php

FALLING SNAGS

Falling snags (dead, standing trees without leaves or needles in the crowns) present a significant hazard to wildland firefighters. Snags typically have much lower fuel moistures than live, green trees; and they burn more readily. In the process, they often throw spot fires far in advance of the main fire and often burn through more quickly than green trees, falling with little or no warning.

- The risk of injuries from falling snags increases during the night operational period when visibility is greatly reduced.
- While the cooler, nighttime period is generally a more effective time to gain control of wildfires, the increased risk from unseen falling snags may limit the widespread use of crews at night in areas of dead and dying timber.
- Environmental conditions that increase risk from falling snags:
 - Strong winds
 - Night operations
 - Steep slopes
 - Diseased or bug-killed areas
- Things to consider when assessing the potential hazards of both snags and green trees:
 - Trees have been burning for an extended period.
 - High-risk tree species (those that are known for rot and shallow root systems) are in the area.
 - Numerous downed trees
 - Dead or broken tips and limbs overhead
 - Accumulation of downed limbs
 - Absence of needles, bark or limbs
 - Leaning or hung-up trees
- Mitigation measures to take:
 - Identify and flag all high-risk snags and green trees.
 - Keep personnel out of the high-risk areas until the hazard has been removed.
 - Establish lookouts.
